

Visionary® Masterclass

A resource for your Visionary clients who are ready to lead at their highest level.

The Visionary Masterclass helps Visionaries master the skills that move their business forward: staying focused on vision and strategy, honing the strengths that only they can bring, and strengthening their half of the V/I Duo.

WHO IT'S FOR

The Visionary who wants to lead on the business, not get lost in it

Any Visionary running on EOS who is ready to deepen their self-awareness, sharpen their leadership skills, and better understand the role only they can play. Works equally well for Visionaries who are newer to EOS and those who have been running on it for years.

WHEN TO BRING IT UP

When your Visionary client is ready to invest in their own growth

When a Visionary asks what they can do outside sessions to get better. When they are struggling to work on the business rather than in it. When you want to strengthen their half of the V/I Duo and help them lead their team with more clarity and intention.

WHAT THEY GET

A four-week virtual program with self-paced weekly modules and live EOS Implementer®-led group coaching calls. Curriculum covers the V/I relationship and the 10 Pillars of Visionary Greatness. Graduates receive a digital certificate and 30-day extended video library access. **\$2,500.**

HOW TO TALK ABOUT IT WITH YOUR CLIENT

- "This is a program built entirely around the Visionary role and the skills that make great leaders great."
- "You will connect with other Visionaries who are navigating the same things you are."
- "It is a focused way to invest in your own development outside of our sessions together."
- "It gives you the language and tools to work on the business at the level you are meant to."
